

## **Artesania Audio Exoteryc Rack (\$8500)**

Remarkably solid and minimalist in design and concept, yet we found it easy to hear this tubular metal rack's sonic benefits. The Exoteryc isolates each component independently by way of its Acoustic Anti-Resonance Treatment technology. Don't know how to explain its sound because it really doesn't have one. Incredibly neutral. Made my previous rack sound dull and colored in the frequency extremes. The Exoteryc's cleaner highs and quieter lows improved the overall solidity and control of my system"
